

Abstract of the Disclosure

A universally shaped puzzle piece is provided that may mate with any side of a puzzle piece having the same universal shape. Instead of placing a portion
5 of an overall puzzle image on the universally shaped puzzle piece, indicia related to a theme are placed on one side. The other side of the puzzle piece may be customizable to a user such that an infinite number of the universally shaped puzzle pieces may be customized
10 and fit together to form a puzzle with a unique image. Thus, puzzle pieces may be distributed to individuals at a public event so that a puzzle is created that represents the overall theme of the event.
